Feb, 2020 To till date(Permanent employee from May 2022)

Global Mortgages is a project which handled the mortgage providing facility to the bank customers in Hong Kong, China, UK, Canada and Malta regions. The staff faced channel accounted for the complete journey which included gathering applicants data which incorporated all the details regarding providing the loan facility and then finally using business logics to calculate a decision on the loan application by the customer.

Roles and Responsibilities :

- Working directly at client location as an automation QA Engineer.
- Working as a QA Tester in the team and involved in test cases prep, testing estimate, DSR/WSR reports, automation scripts creation etc.
- Working on API, UI, Performance and Accessibility testing using various tools.
- Maintained scripts with GITHUB repository and preparing automation reports using extended reports.
- Developing BDD Scripts with Cucumber/Java and writing step definitions for behavior and step definitions.
- Handled API/UI Integration testing automation frameworks.
- Created mocks as part of UI automation framework using Wire mocks.
- Maintained and created new automation scripts for UI testing which used Page Factory and Builder Pattern models.

Roche Diagnostics

(TopGear Initiative worked 2hrs Daily along with Actual Project)

API Automation Lead

April, 2021 To August, 2021.

F. Hoffmann-La Roche AG, commonly known as Roche, is a Swiss multinational healthcare company that operates worldwide under two divisions: Pharmaceuticals and Diagnostics.

Roles and Responsibilities :

- As a part of this TopGrear Initiative, I got chance to create API automation framework for Roche Account.
- In this 5 month, I create API Automation Framework using Rest Assured (JAVA based framework). And as a part of POC I create 50+ test cases.
- Automation framework is build using Maven. And for better readability, I include Cucumber (BDD framework) in it.
- Framework is CI-CD enabled and configurable and highly reusable. I gave successful demo to clients with Local execution and Jenkins execution with cucumber Report.

PROJECTS (CONTI.)

FirstRand Bank

(TopGear Initiative worked 1.5hrs Daily along with Actual Project)

Consultant

August, 2021 To October, 2021

FirstRand Limited, also referred to as FirstRand Group is the holding company of FirstRand Bank, and is a financial services provider in South Africa. It is one of the financial services providers licensed by the Reserve Bank of South Africa, the national banking regulator.

Roles and Responsibilities :

- As a part of this TopGear Initiative. I got chance to participate as a consultant.
- They are migrating their Manual API testing framework to Automation Framework. So, we provided the strategy document mentioning, How they can achieve Automation using the same tool (SOAP UI), they are using for manual Testing.
- My Role is to understand their current framework and provide the strategy to Automate their current Framework.
- And also provide some suggestion on Service Virtualization.
- I prepared the strategy document as a part of Deliverable.
